

CHANCELLOR STATE COLLEGE

Year 10 COMPUTING Assignment KAT2 2007 Multimedia CD ROM

Planning Due _____ Due Date _____

Name _____

TASK: You are to design and create **an interactive** (user friendly) multimedia presentation which explains how the various components in a computer system function. You can use **any software** available on the school network to complete this task. The completed assignment should be handed in on a **CDR or DVD**. (Your project should occupy **50-500Mb**) With the exception of web links all files used should be included on the disk.

It could take the form of:

1. Collected files and folders on a disk with printed instructions
2. An interactive PowerPoint with many links to files on disk or the internet.
3. You could also create a website which runs completely from the disk.

Your disk could include any or all of the following: text (doc, pub)
pictures (jpg, gif) PowerPoint (ppt) web pages (html) sound files (mp3
wav) video (mpg, mov avi)

You could also consider using Microsoft Visio, Photo story, Flash or
Producer files during this assignment. You will be assessed on both
factual information and creativity.

**You must attach hand-written plan and this must
include a detailed bibliography for any material used from the
internet or other multimedia disks. (i.e. specific page URL)**

**Your final disk should be presented in a plastic sleeve or case
and include some original artwork**
