

CHANCELLOR STATE COLLEGE

Year 7-8 ELO Web Design KAT1
Version 2 for Term 2 2006

Planning Assignment Due Date _____

Name _____

Developing any software package or website requires very careful planning. In the case of a website you will always need to consider the following: Its purpose, the target audience, the navigation and links, the size of pictures and graphics, the overall look and ease of use.

During this ELO unit you will be designing and constructing a personal website. For this assignment you are expected to prepare a detailed plan for your website. All this work should be presented in a professional manner and arranged in a document holder.

A copy of this assignment and its matching criteria sheet can be downloaded from my website

<http://www.eastmarinedrive.com/contents/non-static/webdesign-content.htm>

You can also download useful blank story boards and graphic organizers from the same page.

Your planning document should include the following.

1. A title page
2. An index
3. The designs for each page. (These should include print screens, actual pictures used and a detailed description)
4. The HTML code used for each page (copy and paste into Word doc)
5. Details of any special features you have included. (This could include the use of mouse over effects, sounds, marquees, applets etc)
6. A code bibliography, including URLs of any sources of code you have used.
7. A complete image acknowledgement
